Project 4 Write-Up

Q0: Todd Nguyen, noid, March 18, 2021

Q1: Do you think the review of your own code missed anything? If so, what?
I missed a few things, such as the lack of comment on functions. Even if I think my function names are descriptive, it might not be so to other programmers.

Q2: Was there anything you think should be left out of the peer review process? Why?
No, I think the steps in the peer review process are necessary, especially the process where there is a maximum time limit. That will limit the time allotted to look at a few lines of code.

Q3: Did you have any problems with your group? If so, what?
No problem with my group, since it's only just me.
